The Renegade

With its massive log set, deep ember bed, dual burner and huge ceramic glass front, the Renegade is one great-looking fireplace, but what you can't see makes this fireplace even more impressive.

Empire's TruFlame Technology ensures maximum flames and ember glow with minimum emissions. The system starts with independently controlled front and rear burners set in a large ember bed. The burners create a tall lively fire that dances and curls around the hand-painted ceramic fiber logs – generating a continuous tableau of flame shapes and light patterns.
